

LCD Display Digital Dynamometer

Features:

- *Strong and simple tension or gravity tester.
- *High quality aluminum alloy material is adopted, and alloy steel is used for force measurement in a large range.
- *When it is used for tension test, it can realize peak value keeping, real-time force value monitoring and other functions.
- *When it is used to measure gravity, kg LB kn conversion can be realized.
- *With LCD display, low voltage early warning function, can work continuously for more than 200 hours when full charge.
- *Optional, remote control-handheld display instrument-wireless printing instrument-wireless large screen-computer connection, keep away from hazardous test areas.

Max.Capacity	Division	N. W.	Dimensions				
			A	B	C	D	H
